Presentation: June 18 Andrew Lundell, Great Canadian Solar

At our June meeting we had Andrew Lundell, a renewable Energy Technologist from Great Canadian Solar, speaking to us on progress made in the solar energy field.

He started with a description of the mechanics of solar power and then described some of the recent improvements in the field. Some of the developments were fairly technical but the one I liked was his description of using drones to map and measure rooftops before installation. This innovation cut costs substantially.

Tour: June 25 Solar Power Installation Belgravia Community Centre

Our last tour was of the solar power installation at the Belgravia Community League Hall. While we were not able to get on the roof for a close inspection, Andrew demonstrated an app on his cell phone that monitored the power as the sun shone or dimmed behind the clouds.

While not part of the tour, we were also treated by an inspection of Andrew's Tesla
